JOINT CAPABILITY PRESENTATION

USSPPL × Fleetronix

AIS 140 / VLTD Monitoring Centre — State of Andhra Pradesh

Prepared for the Hon'ble Minister for Transport, Government of Andhra Pradesh

Pre-RFP Capability Briefing for the Government of Andhra Pradesh

USSPPL — Lead Bidder

United Strategic Solutions Professionals Pvt Ltd
Hyderabad · India arm of US Software Professionals Inc. (USSP, est. 2003)
Programme governance · solution architecture · Govt delivery

Fleetronix — Technology Partner

Fleetronix Mobility Pvt Ltd · Gachibowli, Hyderabad
AIS 140-aligned VLT, panic-button, and control-tower platform
All-woman founded · 7,000+ devices deployed · India + Africa footprint

About USSPPL

United Strategic Solutions Professionals Pvt Ltd — India delivery arm of USSP

Who we are

- USSPPL is the Hyderabad-based India delivery entity of US Software Professionals Inc. (USSP), an Illinois-incorporated technology services firm founded 23 January 2003.
- USSP has delivered IT modernization, healthcare staffing, and managed-services programs for 20+ years across the United States, India, and Canada.
- USSPPL is the Govt-of-India eligible bidding entity (PAN AABCU9182D) — formed to deliver Centre and State engagements with full local accountability.
- Authorised signatory: Lagishetty Vijay Kumar Setty, Managing Director.

Corporate snapshot

Parent	US Software Professionals Inc. (Illinois Reg. #62642807)	**India entity**	USSPPL — Hyderabad, Telangana
HQ (US)	875 N Michigan Ave, Suite 3100, Chicago, IL 60614	**Offices**	Chicago (HQ) · Hyderabad · Canada
Core values	Integrity · Innovation · Respect · Accountability · Excellence	**Contact**	+1 (312) 546-4306 · www.ussp.co

Why USSPPL on this Mandate

Govt-grade delivery wrapper around proven AIS 140 technology

Programme governance

- PMO + risk + change-control aligned to Govt norms
- SLA-backed managed-services model
- Local signatory and accountability — USSPPL MD
- Familiar with Centre:State (60:40) accounting cadence

Solution & integration

- NIC Cloud · VAHAN · Sarathi integration design
- AIS 140 device-to-Centre data plumbing
- Cyber posture: CERT-In aligned controls
- Identity, audit, and citizen-data protection

Operate & sustain

- 24×7 Monitoring Centre run-book
- Field ops + device lifecycle management
- Reporting to STA / RTO / Police
- Citizen-grievance and SOS workflow

What USSPPL adds to Fleetronix on this bid

Bidding entity	Indian-incorporated lead bidder eligible under State eProcurement	**Govt delivery muscle**	Programme management, audit, and SLA discipline at scale
Technology depth	USSP CTO India on call for AIS 140, NIC, and VAHAN integration design	**Workforce**	Surge capacity through USSP's India bench for rollout and support
Continuity	Multi-decade firm with US parent — reduces single-vendor risk	**Credibility**	ODI / healthcare / fintech delivery references on request

Public-Sector Track Record — State of Illinois (USA)

USSP holds an active prime-vehicle position on the State of Illinois TOPS contract

Illinois TOPS — Technical Outsourced Professional Services

Contract	CMT4599470
BidBuy ID	P-59947
Validity	In force through February 2034
Awarding body	State of Illinois — Dept. of Innovation & Technology (DoIT)

What we deliver under State of Illinois engagements

- Application development and modernization for State agencies
- Cloud, integration, and data-platform engineering
- Cybersecurity, compliance, and identity work to State standards
- Citizen-facing service workflows and case-management systems
- Programme management with full audit and SLA reporting

Why this matters for Andhra Pradesh

- Active, audited delivery posture under a US State Government framework
- Familiar with public-procurement governance, security review, and SLA discipline
- USSP's Govt-grade delivery muscle, scaled into India through USSPPL
- Direct evidence that the same firm can stand behind Fleetronix on a State engagement

Sensor-Based Solutions for US Businesses

How USSP designs, deploys, and operates IoT and telematics platforms in the United States

Edge — devices

- Vehicle telematics units (GPS, IMU, CAN-bus)
- Industrial sensors (temperature, vibration, pressure)
- Panic / SOS button and dashcam variants
- Cellular + LPWAN connectivity

Pipeline — ingest

- MQTT / HTTPS device-to-cloud ingestion
- Edge buffering for low-coverage areas
- Event normalization and validation
- Geo-fence and rule engine in stream

Platform — analyze

- Time-series data lake on AWS / Azure
- Real-time alerting and incident workflow
- AI / ML for anomaly + predictive maintenance
- Dashboards and APIs for downstream systems

Operate — sustain

- 24×7 NOC + SOC monitoring
- Device-fleet lifecycle and OTA updates
- SLA-backed managed-services contracts
- Compliance: SOC 2, HIPAA where applicable

Where this shows up in our US delivery

Fleet & logistics

GPS + driver-behavior telemetry, route compliance, after-hours alerting

Industrial / facilities

Sensor networks for predictive maintenance, energy, and asset utilization

Healthcare operations

Connected-device data flowing into compliant clinical and ops dashboards

Safety & compliance

Panic, geofence, and incident-response workflows for distributed workforces

Andhra Pradesh — VLTD Monitoring Centre

Programme objective

- Stand up an AIS 140-compliant Vehicle Location Tracking & Emergency Response Centre for the State of Andhra Pradesh
- Cover public service vehicles state-wide — buses, taxis, contract carriages
- Deliver real-time visibility and SOS / panic-event response to enhance passenger and driver safety
- Provide a citizen-facing safety promise that the State can showcase

Operating concept

- State-owned Monitoring Centre, run 24×7 with SOP-driven response
- Devices stream location, speed, and SOS events to a central control tower
- Workflows route incidents to Police, RTO, and STA in real time
- Built on a stack already proven by Fleetronix in fleet deployments — extended for Govt scale by USSPPL

What USSPPL + Fleetronix will stand up

Field layer

- AIS 140 VLT devices
- SOS / panic buttons
- Type-approved hardware
- Install + audit ops

Backend

- NIC Cloud-ready stack
- VAHAN / Sarathi linkage
- Geo-fence + alert engine
- Data lake + retention

Monitoring Centre

- 24×7 control tower
- Police / RTO / STA dashboards
- SOP-driven response
- Audit + reporting

Governance

- SLA + uptime contracts
- CERT-In aligned security
- Citizen data protection
- Quarterly Centre reviews

AIS 140 Compliance & Device Posture

Type-approved hardware, regulator-aligned integrations, and field SLAs

Certified hardware

Device	aQuila Bharat101 with IRNSS (Vehicle Location Tracking Device)
OEM	iTriangle Infotech Pvt Ltd, Bengaluru
Standard	AIS 140 upto Amendment 2:2018
Approval body	ICAT — Govt of India (NATIS / National Automotive Board)
COP No.	CC0GV9323 (issued 28-Mar-2026)
Validity	31-Mar-2027 (renewable)
Companion	aQuila SOS emergency button family — TAC ITRPB0029 / 0037 / 0038

Device features

- AIS 140 panic / SOS button — emergency event signalling
- Tamper alerts (case open, power cut, GPS jam detection)
- Built-in backup battery — continuity through ignition cuts
- Dual SIM with automatic fallback for resilient connectivity
- IP + SMS gateway transmission paths
- OTA firmware updates from Fleetronix back-end

Regulator and Govt-system integrations

VAHAN	Device + platform compliant for VAHAN linkage	**Sarathi / STA**	State Transport backend integration supported
AP Transport Dept	Direct integration confirmed by Fleetronix on Bharat101 stack	**AP Police Emergency**	SOS / panic events route into Police emergency systems per AIS 140

Field operations & SLAs

Device downtime resolution	Replacement turnaround	Installation	Ground support
12 – 24 hours	**24 – 72 hours**	**Trained field technicians**	**Dedicated regional team**

About Us

Fleetronix
Swift I Smart I Intelligent

At Fleetronix, we're not just transforming logistics; we're reshaping the future of your business. Founded by visionary women entrepreneurs, our journey began with a mission: combat supply chain theft plaguing different types of firms Fortune 500 clients being one of them. Through relentless dedication, we've achieved remarkable success, expanding from a team of four to 180. By harnessing technology and innovation, we've developed cutting-edge solutions that ensure your cargo's safety and streamline operations. Our commitment to excellence, backed by data-driven insights, drives us to rewrite norms and inspire new possibilities. With Fleetronix, you're not just partnering with a company – you're collaborating with the future

Pan India & Africa Presence

"Securing every mile with advanced technology while empowering every move through reliable and efficient fleet solutions."

"Driven by continuous innovation and built on a strong foundation of trust, we deliver dependable and future-ready fleet management solutions."

Our Mission

Fleetronix
Swift I Smart I Intelligent

Swift:

Ensuring fast, responsive, and timely fleet operations at every step

Smart:

Enabling data-driven decisions for optimized and efficient performance

Intelligent:

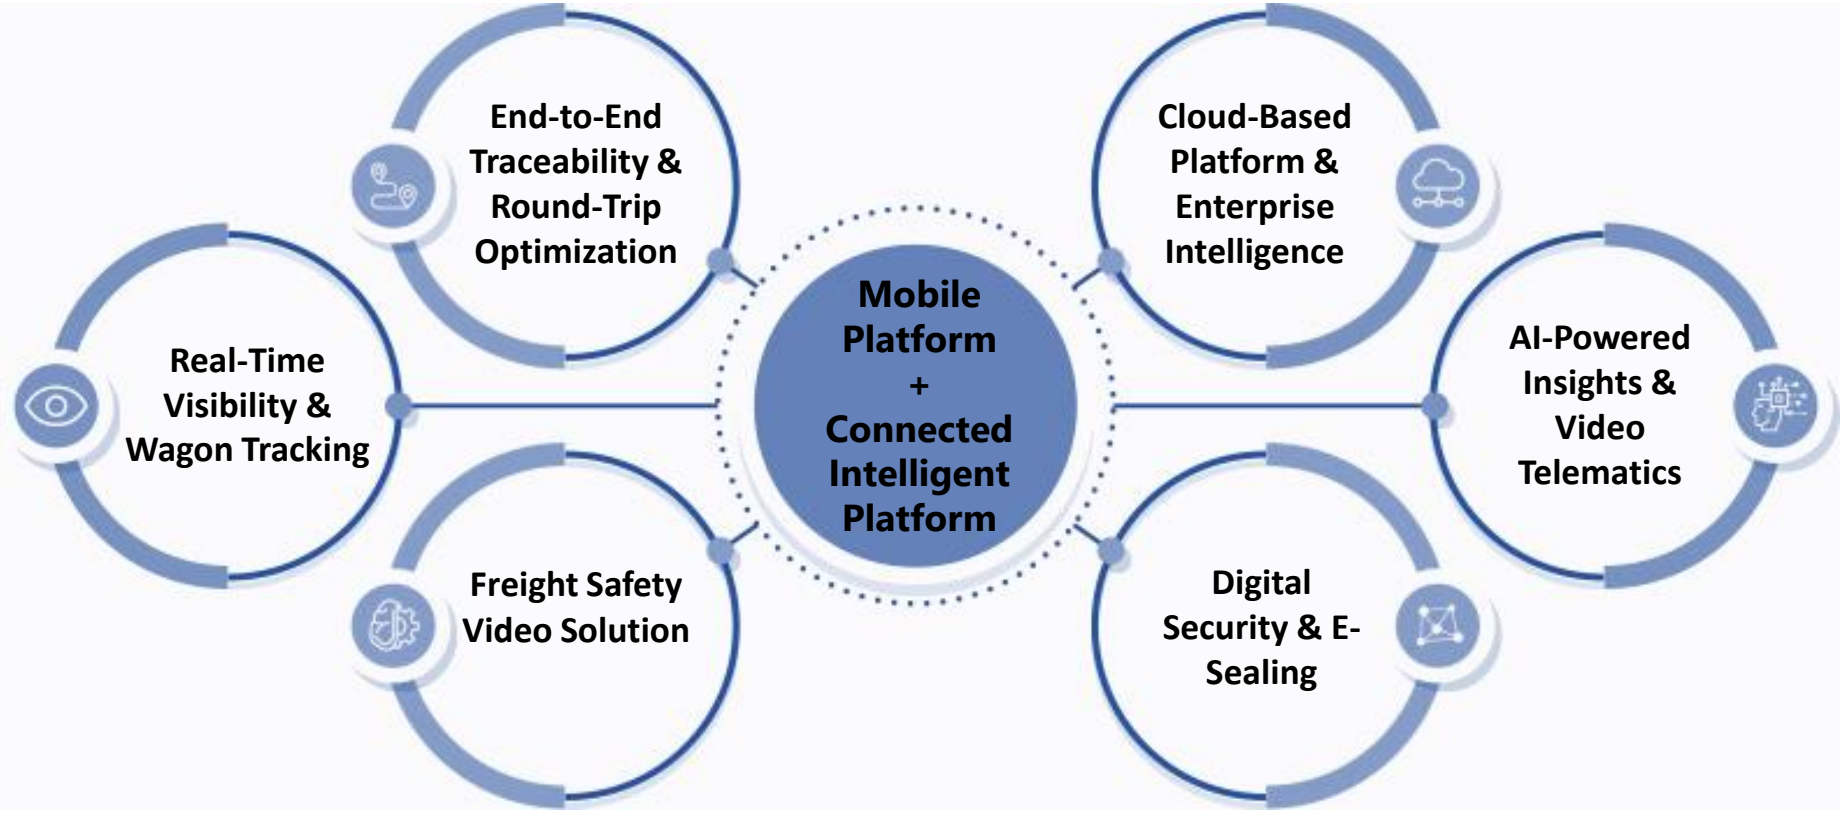
Leveraging advanced technology to deliver accurate insights and proactive solutions

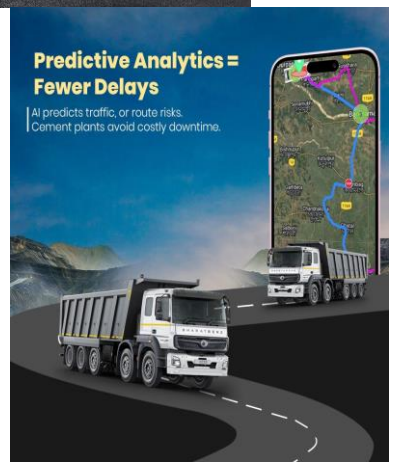
Our Vision

F – Future Ready:
Future-ready fleet and mobility solutions
L – Leadership:
Leading innovation in fleet technology
E – Efficiency:
Enhancing operational efficiency
E – Excellence:
Excellence in service and delivery
T – Technology:
Technology-driven solutions
R – Reliability:
Reliable and consistent performance
O – Optimization:
Optimizing every movement and resource
N – Next-Gen:
Next-generation mobility solutions
I – Intelligence:
Intelligent insights and automation
X – eXperience:
Exceptional customer experience

Generate Value from Digital Transformation

Fleetronix offers an easy-to-adopt user-friendly mobile platform to operate and manage your business on the go.





Fleetronix Differentiator:

Fleetronix
Swift I Smart I Intelligent

From source to destination we manage exceptions
Not just tracking trucks- we track risk, responsibility & results

Loading Delays

- Loading & Unloading waiting time tracking
- Vehicle idle time at the loading location
- Empty vs. loaded vehicle status
- Real-time vehicle presence at loading yard

Breakdowns/ Accidents

- Vehicle breakdown alerts
- Accident detection & alerts
- Sudden Stoppage identification
- Delay at breakdown location

In-transit Delay

- Trip delay alerts during transit
- Route-wise transit time monitoring
- Unauthorized stoppage during trip
- Journey start and end time tracking

Seals mis-match

- Seal tampering detection
- Seal open/close monitoring
- QR seal mismatch detection

Drivers mismatch

- Authorized driver verification
- Driver mismatch identification
- Over-speeding alerts
- Driver compliance violations

Route Deviations

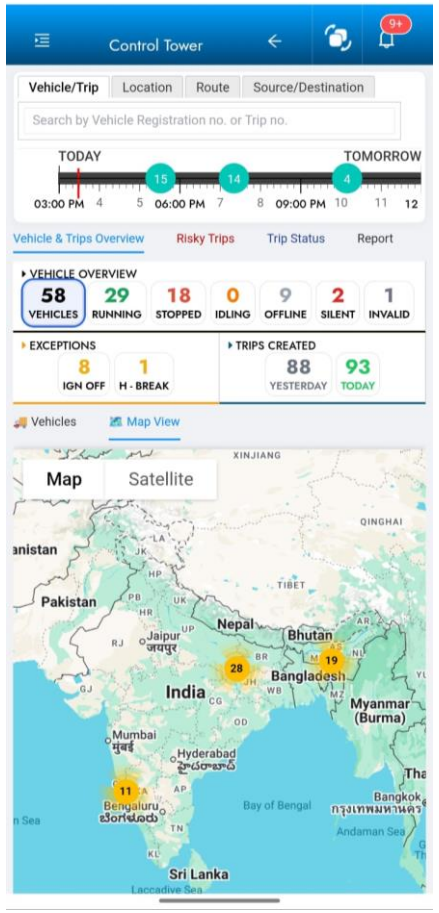
- Route deviation alerts
- Geo-fence violation alerts
- Red zone alerts
- Unauthorized route movement

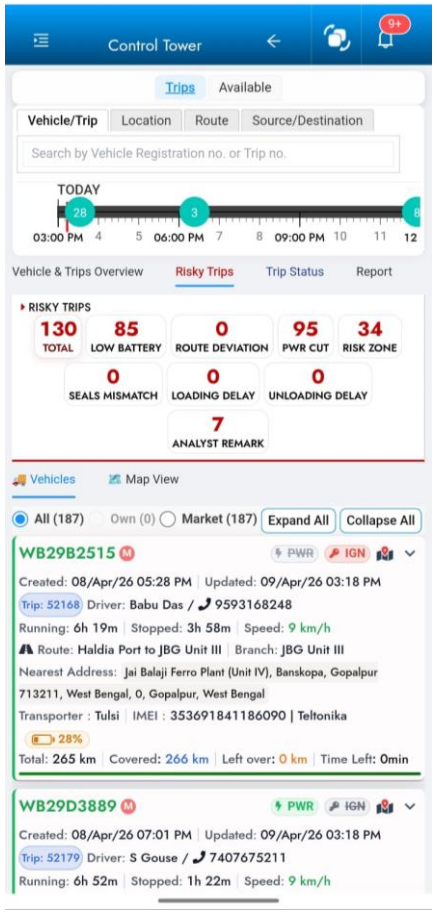
Uninstallation Checkpoint

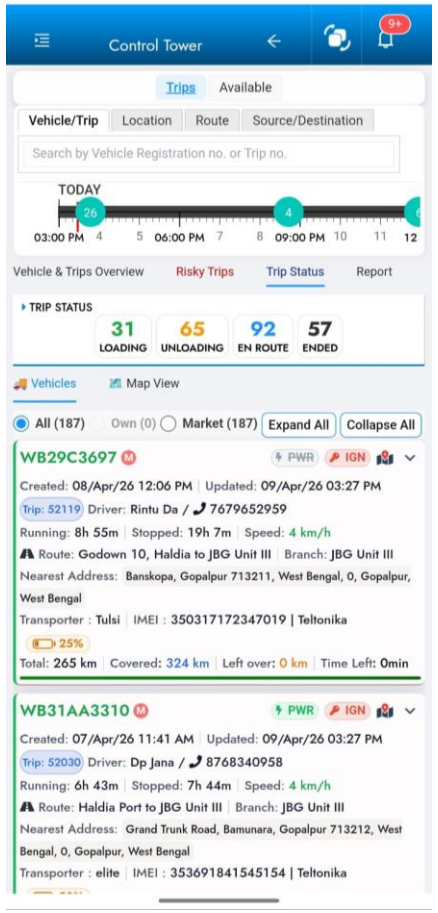
1.Verified uninstallation 2.On-ground physical vehicle audit 3.Immediate plant escalation for anomalies

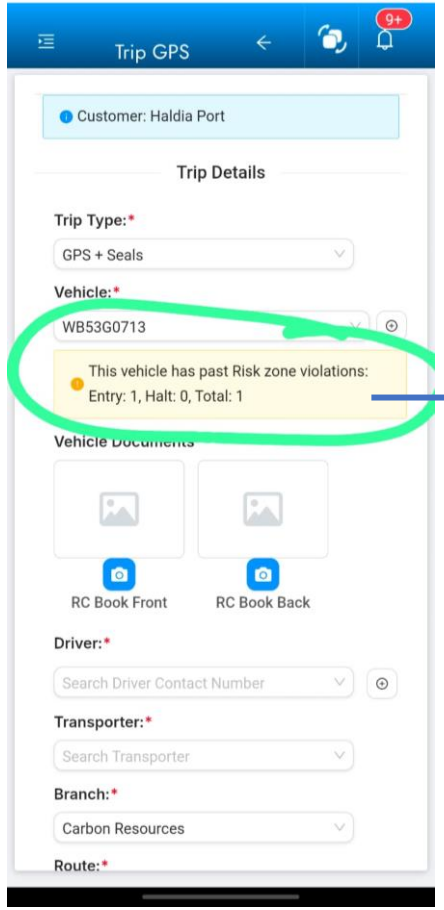
AI-Driven Fleetronix Mobile Application:

Fleetronix
Swift I Smart I Intelligent



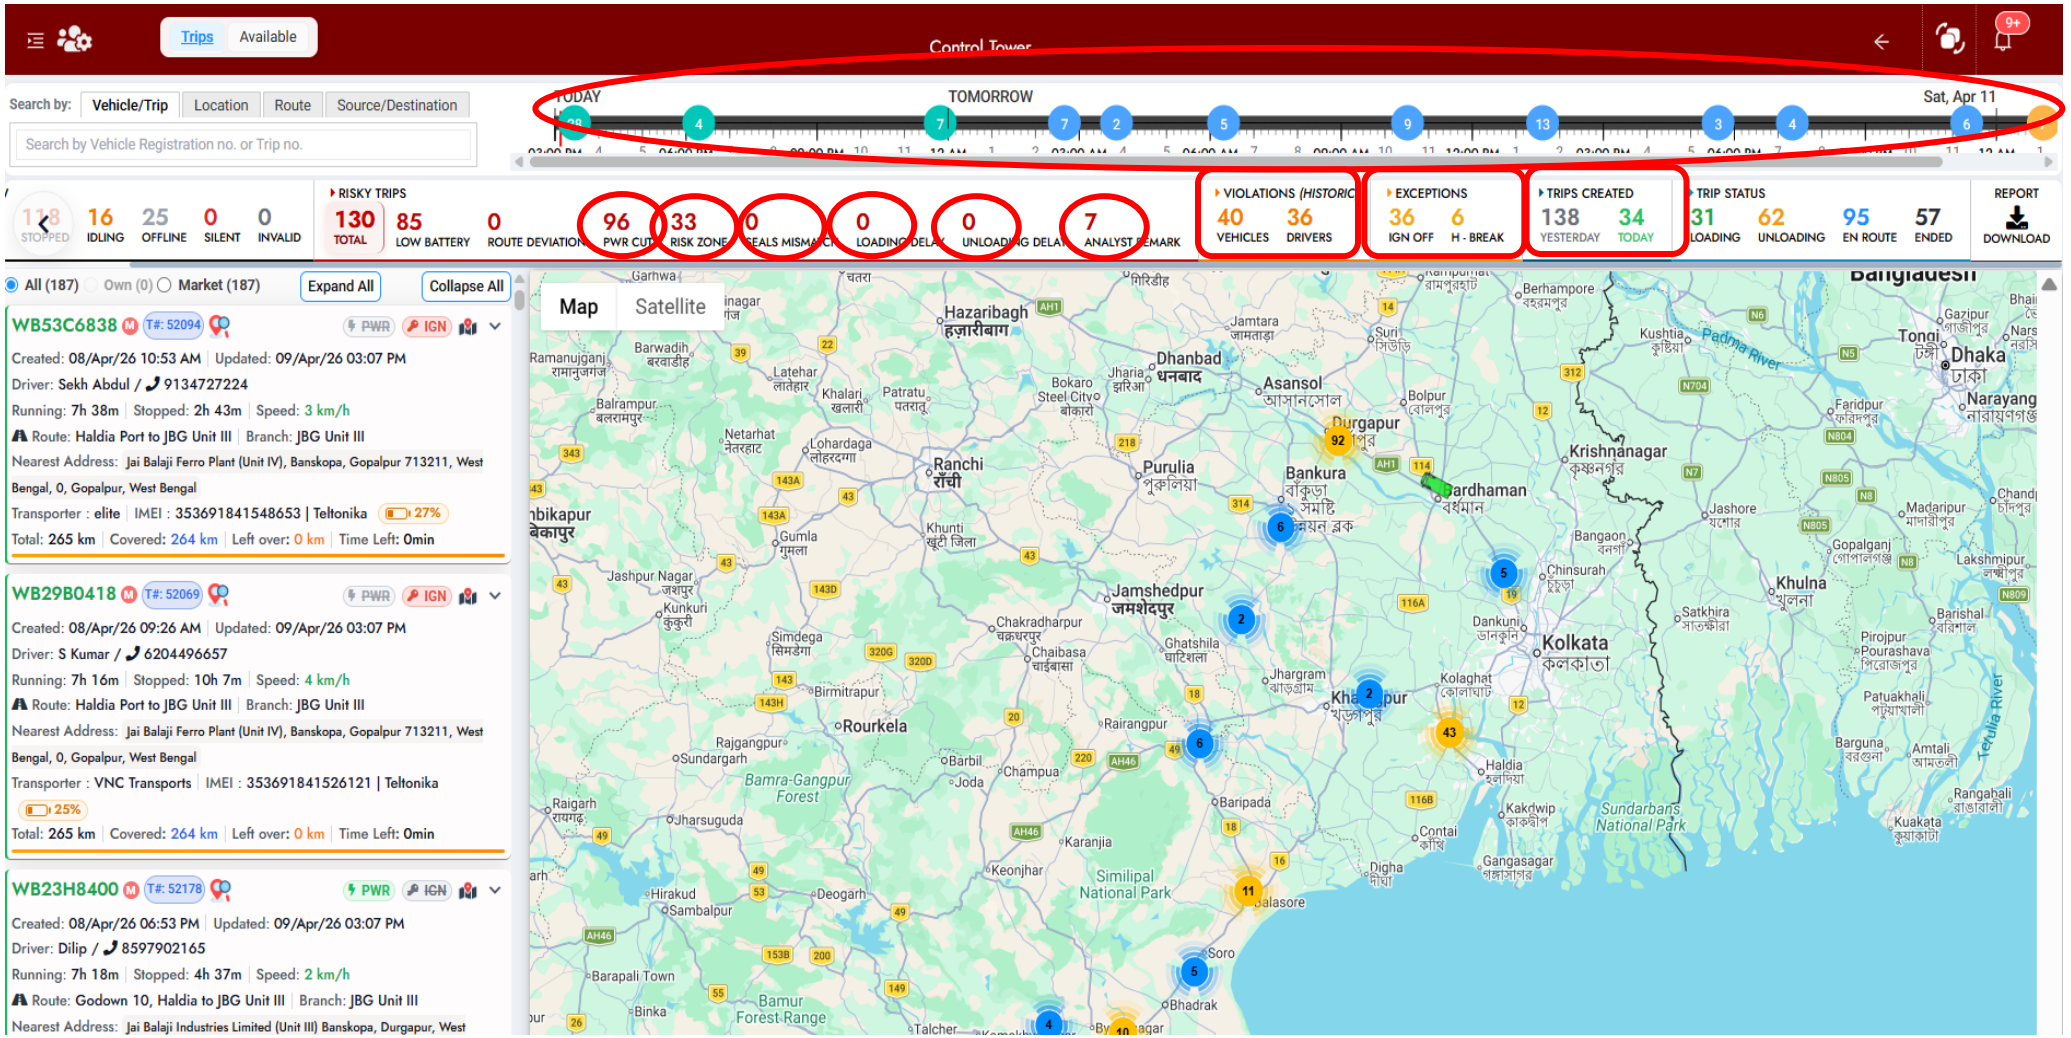






"The AI-driven Fleetronix application intelligently detects and displays vehicles with a history of trip violations, including instances of halts in designated risk zones, enabling proactive monitoring and improved operational safety."

Fleetronix Control Tower:



- **Trips ETA Status**
- **Trips Onboarded Yesterday**
- **Trips Onboarded Today**
- **Count of vehicles at loading point**
- **Count of vehicles at unloading location**
- **Count of vehicles in In-transit**
- **Trips reached & ended**
- **Risky Trips:**

i. Power cut
ii. Red zone
iii. Loading Delay
iv. Unloading Delay
v. Seals Mismatch

- **Violations(Historic)**

I. Vehicles
II. Drivers

- **Exceptions**

I. IGN Off
II. H-Break

- **Trip Status**

I. Loading
II. Unloading
III. En-Route
IV. Ended

Fleetronix Foot Print in India:

		Manganese

Fleetronix New Capabilities:

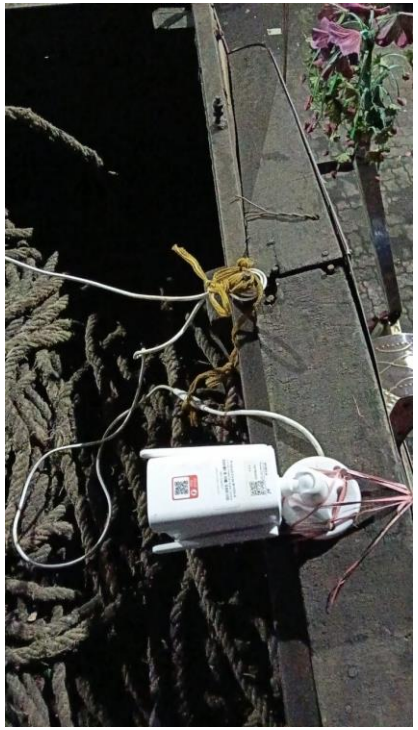
Rail Wagon Visibility & Control:

- **Real-time wagon location** across sidings, yards, and in-transit rail sections
- **Arrival, placement, and release alerts** at source, intermediate, and destination sidings
- **Detention & dwell time monitoring** to identify loading/unloading and yard delays
- **Route & rake consistency tracking** to flag unauthorized diversion or misplacement
- **Exception-based alerts & reports** for idle wagons, missed milestones, and turnaround optimization

WhatsApp Video 2026-01-21 at 1.51.53 PM.mp4

Fleetronix New Capabilities:

Freight Safety Video Solution:

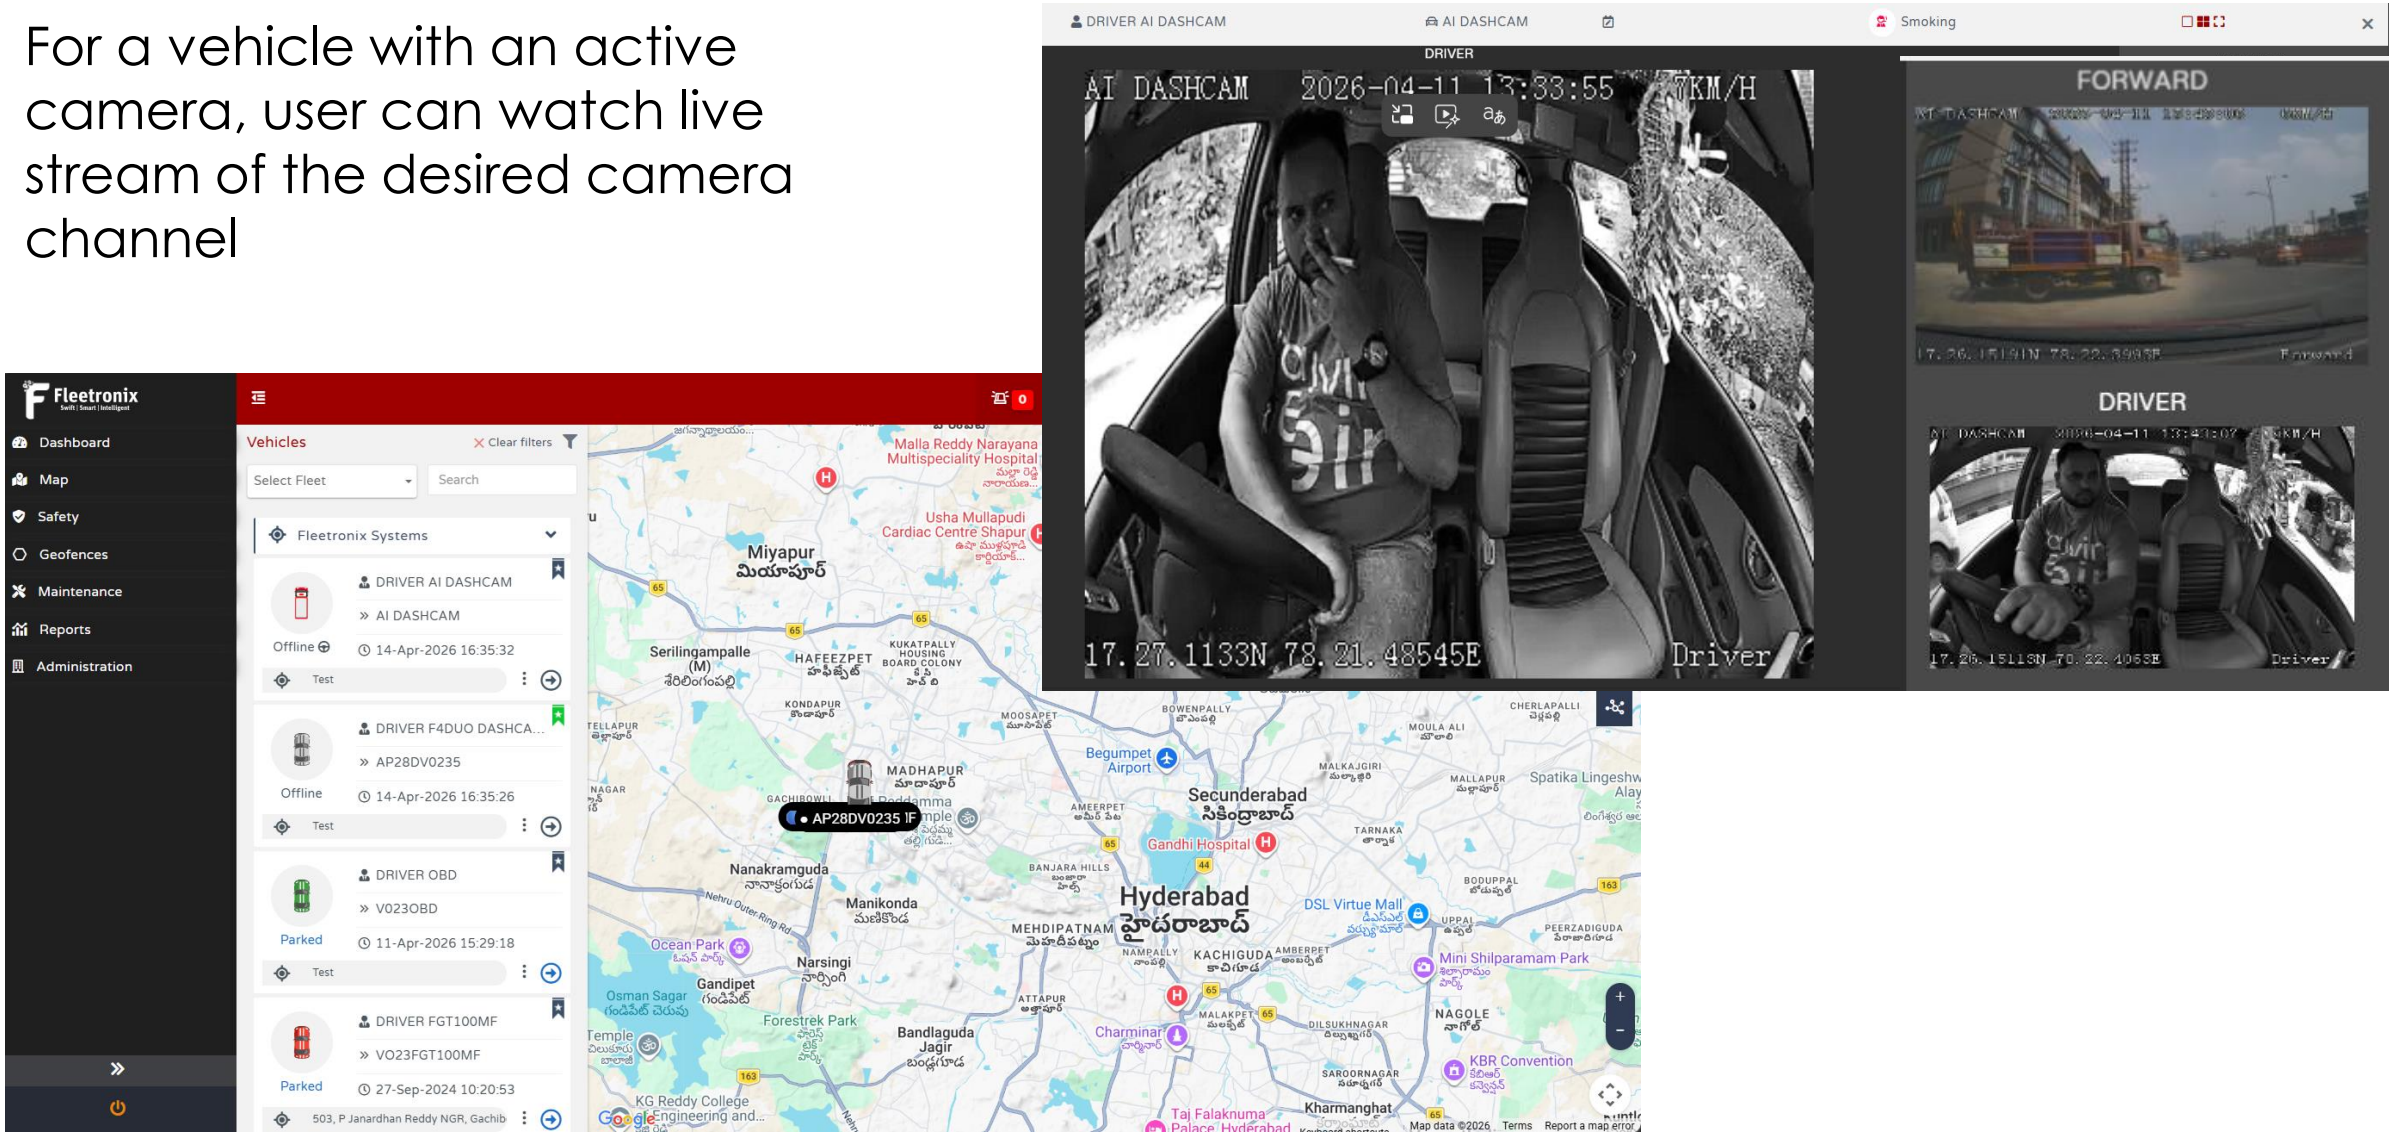


- **Protect every load**, not just every trip
- **Continuous video monitoring** of trailers, loading bays, and doors to detect tampering, theft attempts, and unsafe handling of freight.

Fleetronix New Capabilities:

Live Video Streaming:

For a vehicle with an active camera, user can watch live stream of the desired camera channel

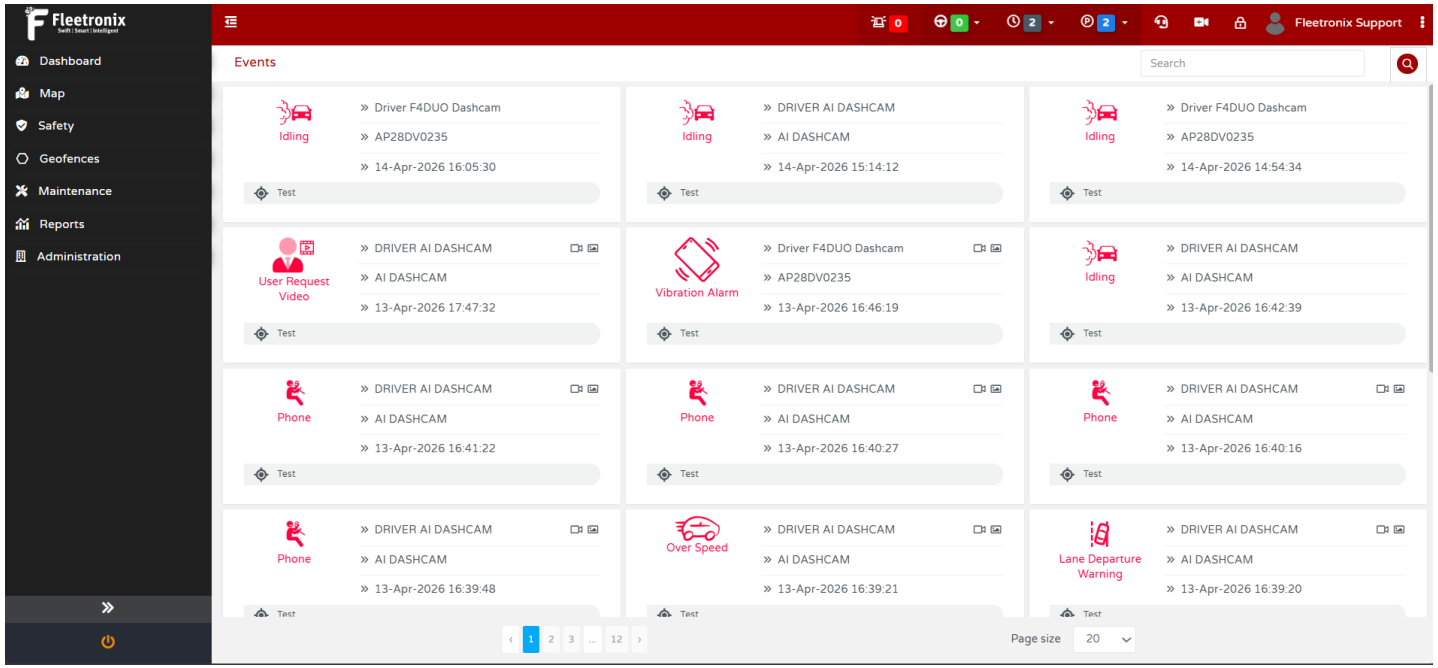


Alarms:

Video Alarms:

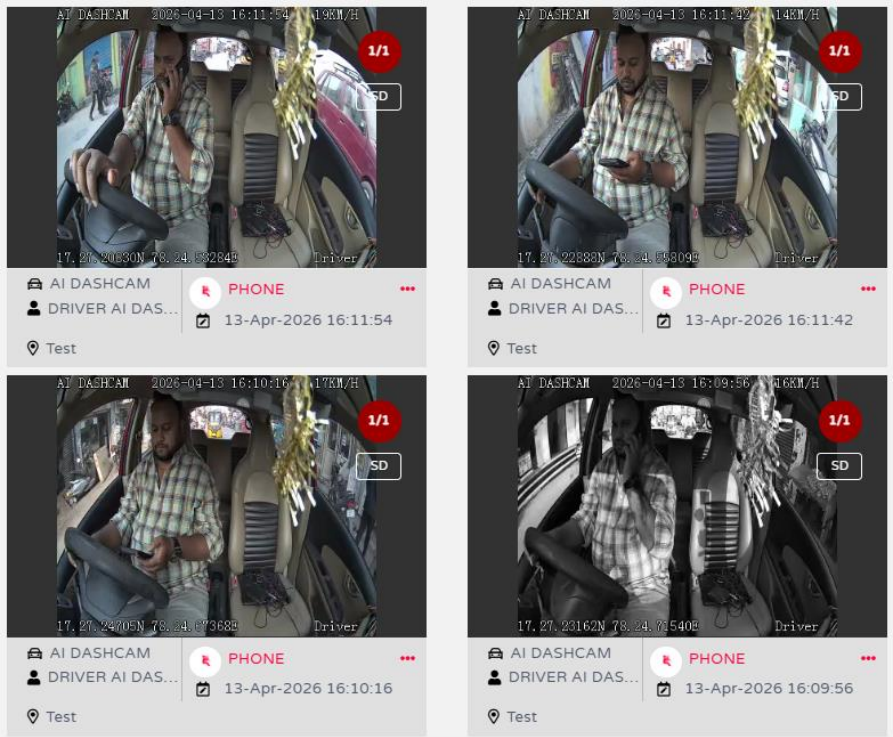
AI Dashcam Alarms:
- ❖ Distraction
- ❖ Unfastened seat belt
- ❖ Yawning
- ❖ Smoking
- ❖ Cell Phone usage
- ❖ Drowsy Driving

ADAS Alarms:
- ❖ Tailgating
- ❖ Forward Collision Warning
- ❖ Traffic Speed Violated



GPS Based Alarms:

Alarms are generated for:
- ❖ Fatigue Driving
- ❖ Geofence
- ❖ Idle Engine
- ❖ Speeding
- ❖ Misuse



Fuel Sensor Solution:

Monitors real-time fuel levels with high accuracy.
Detects fuel theft, sudden drops, and unauthorized usage.
Helps improve efficiency and control fuel costs.

Fleetronix 2.0 — From Utility to Marketplace

Fleetronix
Swift I Smart I Intelligent

Not Just a Utility — A Full Stack for Flow
We evolved from solving single logistics tasks to orchestrating entire transport interactions:

- **Shipper Search Engine + Auto-Matchmaking:**
  - Smart shipper discovery for transporters — categorized, verified, and relevance-ranked.
  - AI-matched loads based on route, capacity, and preference.
  - Driver/Transporter tiering logic built-in
- **Voice/Chat-Based Load Booking**
  - WhatsApp + In-App Voice Assistant (regional language)
  - Reduces tech-barrier for ground users
- **Masked Negotiation Flow**
  - No awkward calls, no broker hijack. Automated, anonymous negotiation until price agreement.
- **Driver & Transporter Matchmaking**
  - Built-in logic for assigning drivers to loads and vehicles — no Excel, no chaos.
- **Zero Escrow, Full Trust Flow**
  - We don't hold funds. We facilitate transparent transactions without delays or wallet complexity.
- **No-Training UX**
  - Designed for truckers and their phones — even a helper boy can operate it without training.

Fleetronix X — From Marketplace to Full Ecosystem

We're building a platform that doesn't just **serve transporters**, it **empowers the entire ecosystem**.

Key Extensions:

- **Load Sharing & Return Matching**: Prevent idle fleets with intelligent load redistribution and empty return utilization.
- **Gamification & Ratings**: Improve driver behavior and app usage with leaderboard-based engagement and trust scores.
- **Accessories Marketplace**: From tires to GPS trackers, monetize footfall via verified hardware/services partners.
- **3rd Party Onboarding**: Anyone can plug in — customs brokers, fleet insurers, fuel card vendors, fastag providers.

A **true logistics infra layer**, not just another booking app.

Why We'll Win

Not a Logistics App. A Logistics OS.

1. Infra-First, Not App-First:
We didn't just build a workflow. We built foundational rails — data, visibility, control — and let the flow emerge.

2. Modular, Not Monolithic:
Drivers, transporters, and shippers don't need one big app. They need **just what they need**, when they need it.

3. Self-Evolving Flywheel:
Every match, route, panic, return, and seal adds to our intelligence. The system **learns** and **optimizes**.

4. Capex-Light, Ops-Free, Truly Scalable:
No fleet to manage. No warehouse to run. No escrow headache. Just product-led scale.

5. India-Specific Behavioral DNA:
From voice-first to panic routing to unbundled pricing — we've **baked Bharat into our code**.

Fleetronix Business Overview

Metric	Details
Turnover (FY 22–23)	1.7 Cr
Turnover (FY 23–24)	5.7 Cr
Turnover (FY 24–25)	5.5 Cr
Turnover (FY 25–26)*	6.5 Cr *(Projected)*
Total Trips (Inception)	4.5 Lakh+
Total Strength	180
Deployed Devices	7,000+

Positioning:

Fleetronix
Swift I Smart I Intelligent

Jai Balaji Group

What does Fleetronix do?

Fleetronix provides in-transit cargo theft prevention
technology and services.

Why should Customers use Fleetronix?

24×7 support, end-to-end service, secure and reliable
tracking at low cost.

Benefits to Customers?

Reduction in supply chain risk.
